## CEDAR WOOD GREENHOUSE PRESERVATIVE

The cedar used in Alton's products has an inherent resistance to rot. If the cedar is not regularly re-treated the colour will fade to a natural silvery-grey.

Alton currently uses an exclusive Golden Honey Wood Preservative on all greenhouses. The warm, natural colour looks superb in any garden setting and the additional wax content helps disperse rainwater. To maintain the original colour, additional cans of Golden Honey Wood Preservative can be purchased directly from Alton or via your local retailer.

We are able to supply you with Golden Honey Wood Preservatives.

How much is required?

Coverage depends on many different factors including moisture content and cleanliness of the timber, but a rough guide to help you (based upon 2 coats) is given below.

*All models up to 20' long = 2.5 litres*

*Octagonal's models = 5 litres*

Prices:

2.5 litres      £25

5 litres        £45

***Prices include VAT, delivery & processing. Please allow 7-10 days for delivery.***

How to order:

Orders will be processed at Alton Greenhouses head office. Please supply the size and quantity required together with your name and address. Items will usually be dispatched on the next working day following receipt of payment.

If paying by cheque, cheques should be made to "Compton Buildings" and sent to Alton Greenhouses, Station Works, Southam, Warwickshire CV47 2XB
