

We've listened to your feedback to make our 2010 greenhouses even better

For the discerning gardener, choosing the right greenhouse is an important decision. Not only must a greenhouse provide the perfect growing environment for your precious and delicate plants, it must also look pleasing on the eye, which is why we've listened to all of your thoughts and comments on how we can make Alton greenhouses even better.

As you can see from these images, we've introduced a host of new features into our Amateur and Traditional ranges that gardeners have told us they would like on their Alton.

Don't just take our word for it, visit one of our displays where you can see for yourself why the Alton 2010 greenhouse range is simply the best value available.

IMPROVED APPEARANCE

1. BROWN BASE KERBS

Alton's famous concrete base kerbs have had a makeover and are now an attractive brown to complement the greenhouse colour. They continue to be invaluable in helping to anchor the greenhouse to the ground and preventing cedar being saturated with moisture.

2. PARTLY BOARDED DOOR

The base of the sliding door is now vertically boarded cedar providing good looks, extra strength and helping prevent breakages.

3. NEW PELMET DESIGN

Alton's attention to detail is shown in the improved pelmet design that features above sliding doors.

4. BROWN POWDER COATED METAL WORK

Co-ordinating with the base kerbs and the cedar to give an improved & more attractive finish.

IMPROVED FUNCTIONALITY

5. HANGING BASKET HOOKS

Eaves and ridge braces feature useful hooks ideal for preparing your baskets and for tying string & adding canes to when growing tomatoes.

6. STEEL BRACING

Durable and strong, discrete brown powder-coated steel bracing has been used throughout.

7. CONVENIENT DOOR LOCKING

New models include a more comfortable handle and a higher locking point, avoiding the need to bend down when opening or locking your greenhouse.

IMPROVED STAGING & SHELVING

8. SLATTED DESIGN

The slatted design ensures good ventilation, promoting stronger plants and preventing disease.

9. STRONGER SLATS

Thicker and stronger laminated, finger-jointed hardwood slats that will stand the test of time.

10. STEEL CANTILEVER BRACING

The strong and clever bracing reduces the need for obtrusive staging legs and high level shelving straps, giving you more room to grow.

IMPROVED SERVICE

11. MANAGED INSTALLATION SERVICE

Saving you time and money Alton's new and affordable installation service ensures you will be ready to grow sooner rather than later.

12. CONTINUED INVESTMENT

New delivery vehicles, quality standard accreditations, ongoing product improvements and improved training all introduced to improve the Alton Customer experience.
