Regency Garden Rooms

©Regency Garden Rooms 2010

13 x 10 Studio shown above with optional extra full length double doors and 6 windows.

The Studio

The Studio is our latest designed Garden Room. It has been designed to offer all the benefits and qualities you have come to expect from our range of Garden Rooms with the added advantage of having an external height of less than 2.5 metres, making it an unobtrusive addition to your garden and helping you to work within current planning regulations.

The standard Studio, as shown bottom right, includes a single fully glazed door and three double vented windows, and is double-glazed and insulated throughout.

As with all our Garden Rooms, the Studio can be designed using our bespoke service, which enables you to create a building that meets with your own individual requirements. The main picture shows a Studio with fully glazed doors and windows ensuring that maximum light enters the building. The central image shows how, by also extending the roof and walls, and finishing the building with clear lacquered cedar the appearance can change again.
